

Ocean Class 1 End of Spring 1 Newsletter

This half term we have been fascinated by our new SPACE topic. The children have been engaged and very enthusiastic about learning all about the Solar System. We have loved pretending to be astronauts in our NASA Space Station role play area and written some exciting space adventure stories.

In Science we have investigated MATERIALS describing them, naming them and identifying purposes for them.

We have also been so impressed to see how much our children have grown in confidence and independence this term. We are all so proud of how much they can do by themselves.

Amazing work Ocean Class 1 !
