

Time to share a little of what we have been getting up to in Class 5 this half term! In *science* we started off by trying to make static electricity with balloons – the class found it very amusing making each other's hair stand on end! We then focused on building a range of electrical circuits and working out what affects each component.

PE has involved the children learning about the Haka, and making their own versions – some fantastic efforts and impressive moves!

Patience and resilience have been key (and that's just for me) during our DT project – designing and creating a stuffed toy. The class have honed their sewing skills. (And I have become an expert knot undoer...)

We had the most fantastic day as part of our *history*, having the visit from WW1 reenactor Tom Powell. Not only was it very interesting and engaging, but it led to the children producing some excellent WW1 letters home from a soldier – they were just amazing!

Well, we ended the year with our fabulous *Christmas performance* – I will never forget you,

Cool Colin Curbishley ☺. **Merry Christmas!**
