

Spring has sprung in Class 5! We have been making the most of the drier weather and getting outdoors for **science** - bird watching! We have been investigating the number and species of birds in our local environment. We have also been finding out about the human circulatory system and comparing it to other living things. Fascinating! At the start of Spring 1, we enjoyed a chilly nocturnal hunt for living things in Skipton Wood - we saw bats and heard owls, which was exciting. (We also dipped biscuits into a mug of hot chocolate and make spooky faces in the torch light- the best part.) We created some fabulous mixed-media paintings in **art**, harnessing mood and atmosphere - demonstrated by the work of Alfred Wallis; followed by a 'design your own street food' project in **DT**...some 'unusual' flavour combinations were tried and tested! At **Crucial Crew**, we participated in a number of safety workshops to make us more streetwise. Linked with geography (Mountains and Coasts), we have been writing non chronological reports about our 'Top 3 Mountains', and poems about mountains, using the subjunctive mood. It's fair to say that the term has flown-by! 😊
